PRANATHI GUDIPALLY

Hyderabad, India | +91-6309085636 |
pranathivnr27@gmail.com |[Linkedin][github]

SUMMARY

Detail-oriented and passionate Full Stack Developer with a strong foundation in Java, Python, React.js, and Node.js. Skilled in building scalable web applications, RESTful APIs, and working with databases like MongoDB and Supabase. Proactive problem solver with a keen interest in software security, API integration, responsive design, and cloud deployment. Highly collaborative team player with a drive to learn and contribute in fast-paced environments.

EDUCATION

B.Tech – Computer Science & Data Science, VNR Vignana Jyothi Institute of Engineering and Technology
2023 – Present | CGPA: 9.31

WORK EXPERIENCE

Infosys Springboard Internship 6.0 (B1)
AI/ML Intern

- Developed **EnviroScan**, an AI-powered pollution source identification system using **machine learning** and **geospatial analytics** to analyze and classify environmental data.

Bharat Economic Forum (BEF)
Web Development Intern

- Built and optimized **responsive web application features** using **React** and **JavaScript**.
- Collaborated with the development team using **GitHub-based version control**, following best practices for code management and teamwork.

SKILLS

Languages: Java, Python, C/C++, SQL
Web Development: HTML, CSS, JavaScript, **MERN Stack (MongoDB, Express.js, React.js, Node.js)**
Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Tools: Git, GitHub, VS Code,Tableau,PowerBI
Soft Skills: Communication, Teamwork & Leadership, Critical Thinking, Adaptability

PROJECTS

BEF Web Platform Enhancement| React, JavaScript, HTML, CSS, GitHub

[Link to Project]

- Built responsive frontend components focusing on usability and cross-device compatibility.
- Implemented modular UI features using React and modern JavaScript practices.
- Collaborated via GitHub for version control and code integration.

EnviroScan: AI-Powered Pollution Source Identifier | Python, Machine Learning, Geospatial Analytics.

[Link to Project]

- Built a frontend emergency response platform enabling users to send instant safety alerts to trusted contacts. Implemented a panic button and manual location sharing feature, focusing on simplicity, accessibility, and seamless user experience

ACHIEVEMENTS

- Finalist, HACK4SDG - AISEC x IIT Hyderabad (Top 10%)
- Top 100 Competitor, Top100CODERS - Krithomedh, VNRVJIET

CERTIFICATIONS

- Tableau Certified Data Analyst (Udemy)
- NPTEL Elite Certification - Modern C++ Programming,IoT
