# PRANATHI GUDIPALLY

Hyderabad, India | +91-6309085636 |
pranathivnr27@gmail.com |[LinkedIn] [github] [Portfolio]

## SUMMARY

**Detail-oriented developer with hands-on experience in building scalable web applications and data-driven solutions through internships and projects. Proficient in Java, Python, React, and SQL, with strong problem-solving skills and a solid foundation in core computer science concepts. Eager to contribute to technology-driven organizations by developing efficient and reliable software solutions.**

## EDUCATION

**B.Tech – Computer Science & Data Science**, VNR Vignana Jyothi Institute of Engineering and Technology
2023 – Present | CGPA: 9.32

## WORK EXPERIENCE

**Infosys Springboard Internship 6.0 (B1)**
*AI/ML Intern*

- Built an AI-based pollution source identification system using machine learning and geospatial data.
- Performed data preprocessing, model development, and evaluation on real-world datasets.

**Bharat Economic Forum (BEF)**
*Web Development Intern*

- Developed responsive web features using React.js and JavaScript.
- Collaborated using Git and GitHub following industry development practices.

## SKILLS

**Programming Languages:** Java, Python, C/C++, SQL
**Web Development:** HTML, CSS, JavaScript, React.js, Node.js, MongoDB
**Data & Machine Learning:** Machine Learning, Data Analysis, Classification, Regression
**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
**Tools:** Git, GitHub, VS Code, Tableau, Power BI

## PROJECTS

*BEF Web Platform Enhancement| React, JavaScript, HTML, CSS, GitHub*
[Link to Project]

- Developed responsive and modular frontend components using React.js and modern JavaScript practices.
- Improved user interface performance and cross-device compatibility.
- Collaborated with a team using Git and GitHub for version control and efficient code integration.

*EnviroScan: AI-Powered Pollution Source Identification System| Python, Machine Learning, Geospatial Analytics.*
[Link to Project]

- Developed an AI-based system to identify and classify pollution sources using machine learning models and geospatial data.
- Performed data preprocessing, feature extraction, and model evaluation on environmental datasets.
- Built analytical insights to support data-driven environmental monitoring and decision-making.

## ACHIEVEMENTS

- Finalist among top 10% teams in HACK4SDG (AISEC x IIT Hyderabad).
- Top 100 performer in Top100CODERS competition conducted by Krithomedh, VNRVJIET.

## CERTIFICATIONS

- Tableau Certified Data Analyst – Udemy
- NPTEL Elite Certification – Modern C++ Programming
- NPTEL Silver Certification – Internet of Things (IoT)
